ART UNIT PAPER NUMBER

2816

DATE MAILED: 04/05/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

10/681,517

Applicant(s)

LO ET AL.

Examiner

Hai L. Nguyen

Art Unit

2816

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 08 December 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-20 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-20 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☒ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 08 December 2003 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities: page 2, line 11, "16" should be changed to --17-- as shown in FIG. 1.

Appropriate correction is required.

2. Claims 14 and 16 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. A receiver limitation of claim 14 does not further define the phase control loop circuit of claim 1.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is indefinite because the limitations "a reference frequency signal", on line 3, and "a reference frequency", on line 20, lack clear antecedent basis. It appears that this "reference frequency signal" is the same as "reference frequency signal" recited on line 1 of claim 1; and this "reference frequency" is the same as "reference frequency" recited on line 4 of claim 1.

Claims 2-18 are rejected due to their dependencies on claim 1.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-5 and 17-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Bellaouar (US 6,566,966).

With regard to claims 1 and 19, Bellaouar discloses in Fig. 1 a phase control loop circuit, and a method of use thereof, for tuning to a reference frequency signal comprising a phase lock loop (PLL) circuit (10) being responsive to the reference frequency signal (Fref), the PLL circuit including a voltage control oscillator (VCO; 14) for generating a VCO output (Fin); the phase control loop circuit processing the VCO output to generate an output frequency signal (Fv); and a coarse tuning circuit (18- 24) being responsive to the PLL output (Fin), for processing the same to generate a counter output (18), the VCO being responsive to the counter output, the counter output being used for coarse tuning the output frequency signal to the reference frequency signal, the coarse tuning circuit further responsive to a lock detection signal (START), the lock detection signal for controlling the counter output to cause the output frequency to be within a predetermined range of frequencies including the reference frequency, the PLL circuit for fine tuning the output frequency signal to the reference frequency signal, wherein the PLL circuit and the coarse tuning circuit tune the output frequency to a reference frequency included in a wide range of frequencies.

Art Unit: 2816

With regard to claims 2-5 and 17-18, the references also meet the recited limitations in these claims.

Claim 20 is similar rejected; note the above discussion with regard to claims 1 and 19.

Allowable Subject Matter

7. Claims 6-13 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art of record fails to disclose or fairly suggest a phase control loop circuit (30 in instant Fig. 3) for tuning to a reference frequency signal (70), as recited in claim 6, having specific structural limitations such as a coarse tuning circuit (44) includes a comparator circuit (46), the comparator circuit including a first comparator (48) and a second comparator (50), the Vctrl signal (49) being included in the PLL output, the first and second comparators being responsive to the PLL output, the first comparator being responsive to a first fixed value signal having a first voltage value ($V_{cc} \cdot 2/3$), the second comparator being responsive to a second fixed value signal having a second voltage value ($V_{cc} \cdot 2/3$); and being configured in combination with the rest of the limitations of the base claims and any intervening claims.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Sutton (US 6,380,810) is cited as of interest because it discloses a reduced lock time for a phase locked loop circuit.

Art Unit: 2816

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hai L. Nguyen whose telephone number is 571-272-1747 and Right Fax number is 571-273-1747. The examiner can normally be reached on Monday-Thursdays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Timothy Callahan can be reached on 571-272-1740. The official fax phone number for the organization where this application or proceeding is 703-872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 571-272-1562.

10. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
